TECHNOLOGY for COSMETIC INDUSTRY

PRESSING MACHINE FOR COSMETIC POWDER LM 10 B

Vertical hinged
opening system

Modello LM 10 B

Description

Machine suitable for cosmetic powders compaction such as eyeshadow, blush, face powder, in pans of different materials, then to be packed in the trousse.

Made with a very strong welded tubular structure, with stainless polished panels in AISI 304 and polished chromium plated base. The pressing cap has a **vertical hinged opening system**.

The machine is equipped with:

- Double and separate compacting pressure regulation from the front touch screen panel. Both pressures can be adjusted according to different requirements.
- Hand pump for the lubrication of sliding points.
- Safety mechanical locking system of the pressing cap.
- Three adjustable air connectors for pressure regulation.
- Multifunctional touchscreen panel, four basic work programs: 'fondello', 'tassello', 'cassata' and 'manuali'.
- PLC for the control of all the machine functions.
- Safety protection barrier on two sides.

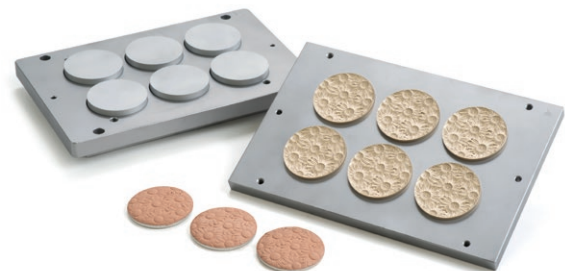

Optional:

- Cloth unrolling device.

- Device for the remote assistance.
- Hydraulic system with oil temperature control device.
- Opening key for locking handles.
- Up to 10 different pressing cycles.
- Oil flow controller with high precision regulation of the compacting cylinder.
- Compactness cylinder with long upstroke for double molds.

Technical specifications

| Technical specifications | | LM 10 B |
|--------------------------|-----|--------------------|
| Installed power | kW | 4 |
| Mains voltage | V | 400 3ph |
| Frequency | Hz | 50/60 |
| Height | mm | 1800 |
| Width | mm | 1720 |
| Length | mm | 900 |
| Weight | kg | 1300 |
| Operating pressure | bar | 130 |
| Hydraulic unit | Lt | 70 |
| Control panel | | colour touchscreen |

We make also stamping dies if required.

We reserve the right to implement modifications without notice
