The past shapes our future

Rejves Machinery S.r.l. was created in 2002 upon the initiative of Renzo Vesentini who started designing and building his own machines, thanks to his knowledge from his 30 years of experience acquired as a designer and R&D manager within the packaging industry (fillers, cappers, labelers and full packaging systems).

Today the company consists of a young, dynamic team who succeeded in installing more than 250 systems worldwide.

Certifications:

- Directive 2006/42 / EC - 2006/95 / EC (LV)
2004/108 / EC (EMC)
- ATEX Directive 94/9 / EC
- Protocols validation DQ-IQ-OQ-PQ

A TIMELY ANSWER TO YOUR PACKAGING NEEDS

Our goal is to provide solutions intended for the packaging industry and to represent across the world the technological excellence that Italian companies have in their DNA.

CHANGE AS TIME CHANGES

Rejves Machinery's objective is to stand-out from the competition through offering cost efficient solutions beyond standardization, to innovate and provide tailored applications to the needs of our clients. The bottles' and caps' design is always evolving, people are always looking for something new and unconventional. A modern company must be ready to embrace the change and provide new technologies to meet all market's demands.

Linear Monoblocs

Linear Monoblocs

Linear Monoblocs combine the ease of use with the maximum flexibility in terms of changeover and access to the machine. We define Monobloc the packaging machine that combines both filling and capping in one single basement. These cost efficient solutions are suggested when multiple products need to be managed in the same packaging line.

Industries

-  Food & Beverage
-  Home & Personal Care
-  Pharmaceutical
-  Industrial & Chemical

Filling Technology

- Flow Meters
- Mass Dosers
- Piston Pumps

MRL/FM

Up to 120 Bottles
per Minute

The filling section in our MRL can be implemented with our latest technologies like CMT or DDT as well as our Robotic application. Optional mass flow meter technology (Mass Measuring/Mass Dosers) as well as piston pumps are available.

Mass flow-meters are particularly suitable when handling liquid products without electrical conductivity, such as oils, lotions, creams etc.

Piston volume filling on the other hand provide enormous benefits in hazardous areas and/or with high viscosity products. The capping section can be both linear or rotary, depending on the output speed and flexibility required.

The machine can be supplied in food grade, ATEX, Anti Acid and Aseptic Versions.

Containers:

Italian Craftsmanship

Italian craftsmanship has become an actual brand, synonym of quality and passion and because of that Rejves Machinery's products are 100% made in Italy. This means that every part that we do not manufacture internally, is provided by Italian companies located mostly in our geographical area, so that we have total control over the processes and the quality of the components provided.

TAILORED SOLUTIONS

Customized applications are the present and future of our industry. At the design phase, we carefully analyze all the requests from our customers, working in symbiosis with them to achieve the meant objective. Usually we start from a standardized application, then, we tailor it on the client's unique application.

CUSTOMER SERVICE

Rejves Machinery, thanks to the skills of its technicians and engineers, can quickly solve any potential issue both on-site and/or remotely, delivering replacements parts as well as step by step instructions to allow our clients to be completely self sufficient with the required intervention. We have a monthly Newsletter service as well, to keep our contacts up to date on the initiatives and news about our company and the packaging industry.

Sales Network

Rejves Machinery's products are 100% made in Italy. We export over 90% of our production worldwide, from Europe to North and South America, Asia, Africa and Oceania. We take part to the most important trade fairs and we rely, as well, on a widespread sales network able to ensure an efficient and precise service.
