SOLUTION FOR SERIALIZATION OF FLAT CARTONS

Track and trace workstation

Trackflat. Serialization of flat cartons.

Trackflat is a workstation for the **printing**, the **control** and the **serialization** of flat cartons

Compactness

Offline
production for
different lines

Quick format
change

Flexibility

Easy to use

Trackflat is a compact and versatile solution designed to handle flat cartons and it is ideal for the serialization of small and medium sized batches.

Control results are **shown on the display in real-time** along with **instructions** regarding the steps to execute, maximizing clarity and visibility for the operator.

The loaded cartons are **automatically distanced, printed, checked and serialized**. The wrong cartons are **automatically sent to a rejection bin** while the correct cartons are orderly sent to a vertical gathering compartment in order to be transferred to the packaging lines.

The **powerful serialization software** precisely transmits the machine information to subsequent packaging line machines.

Carton feed

Carton printing

Camera inspection

Infeed

The system is specifically designed for pharma market

The workstation is particularly **compact and ergonomic**. Each work phase is agile. **Format change operation is simple** and requires very few adjustments.

The printing and serialization of flat offline cartons makes it capable of **simultaneously supporting multiple packaging lines**.

Light units and cameras are specific for the optimal reading of variable data on flat cartons.

The system is **compliant with all the regulations of the pharmaceutical industry**, with user access regulated by the directives of the FDA 21 CFR part 11 regulations. All events are registered in an audit trail file. Software development is Gamp 5 compliant.

Native integration with SEA Vision systems

Trackflat is a solution that natively integrates with trackability systems and with Yudoo, the 4.0 software suite for the centralized production management.
